## **ROMANIAN LINKED OPEN GOVERNMENT DATA(LOGD) ARCHITECTURE**

### **Abstract:**

Linked Open Government Data(LOGD) facilitates the integration of data and allows the link between the disparate government data sets. The increasing use / reuse of the releases LOGD increases the need to improve the quality of data. The availability of LOGD allows the creation of new services offered by the public / private sector. The reuse of LOGD in the e-government applications leads to a considerable reduction in costs. The article is divided in 3 sections. The first section is describing the facilitators in developing romanian LOGD ecosystem, the second section is identifying the impediments and the third section propose an architecture for a coherent Romanian Linked Open Government Data Ecosystem.

### **Keywords:**

Linked Open Government Data(LOGD), Romanian Linked Open Government Data, Open Government Data

**JEL Classification:** M15, C89
