ITUC “GLOBAL POLL 2014” REPORT AND SAMPLE OF TURKEY

Abstract:

In these days that in financial difficulty on worldwide, developed and developing countries are affected adversely from this situation. Due to these issues economical structures of these countries are damaged and changes occur in the governments market policies.

Inside the “ITUC Global Poll 2014” report which is prepared by International Trade Union Confederation (ITUC) within 14 countries, the social and economical issues of both developed and developing countries are researched in Turkey’s point of view. The results will be considered and a benchmark will take place with other countries which are attended to the poll.

Even though there are a lot more subjects to consider, minimum wage, current economic situation, work stability, unemployment and government policies due to the unemployment are discussed in this research.
